BMW N20 ENGINE

Oct 20, 2020

[Bmw N20 Engine](#)

The BMW N20 is a turbocharged four-cylinder petrol engine which replaced the N53 (or BMW N52 in some markets) and was produced from 2011-2017. Although the N20 is a four-cylinder engine, it is considered a replacement for the naturally aspirated six-cylinder N52/N53 because it powers equivalent models, producing similar horsepower to the N52/N53 with greater low-rpm torque and better efficiency.

BMW N20 engine repair because of timing chain failure. The N20 will fire at every half turn which is 180- degrees this will (two full turns equates to 720 degrees for all the 4 cylinders to be fired) which is problematic for the single row timing chain. I can tell you from the past, the last generation 4 cylinder sold in this part of the world was the M44 (before was the M42) which had a dual ...

The N20 engine originally used the company-standard 5W30 engine oil. But as fuel economy standards were raised BMW switched the spec to 0W20. No mechanical or internal changes were made but this helped fuel economy and lower emissions. We would continue to recommend 0W20 for a daily driver but for any tuned engine, or any engine that sees aggressive driving or track use, we would rather see ...

Ik rijd nu net een jaar met mijn 320i, N20, in het begin dacht ik dat de ketting ratelt, vooral koude start, lijkt alsof een diesel motor is. Nadat de motor eenmaal warm is geworden is ratelen bijna niet meer te horen. Bij Poelgeest in Amstelveen hebben ze me verteld dat dit heel normaal is voor dit type motoren. Als ik bij stoplicht stil sta zet ik automaat in neutraal en dan verdwijnt de ...

An upgraded intercooler will do a better job controlling temps so that your N20/N26 engine performs at 100% output. If you live in a hot area and are on a budget, look into upgrading your cooling components rather than just performance parts. Tune will increase boost to make more power. Charge pipe does not offer any power gains but it is always a good idea to replace the weak plastic stock ...
