Hubs are either locked manually or automatically lock when you engage the four-wheel drive, depending on the type of four-wheel drive system in the vehicle. If your locking hubs are bad, it will affect the entire four-wheel drive system. There are several signs that your vehicle will exhibit if the hubs have broken or gone bad. Not Properly Engaging. If you have a broken hub, your four-wheel ...

Since the day Arthur Warn invented the locking hub, Warn has stayed at the forefront of hub technology. Now we've expanded the line to include new Premium Locking Hubs for late model Ford Super Duty trucks—the first generation to feature WARN's aggressive new hub styling. Check out the chrome and black offerings and remember: When it comes to hubs, Warn is the brand to trust.

[I Need a digram of the manual locking hubs for a 1991 F250 ...](#)

Leaving your hubs locked will cause no damage to your vehicle and will not influence it's handling. However, driving with part time 4WD engaged (if you have hubs - you have part time 4WD) on dry sections of pavement you will not only create unsafe driving due to understeer - you may also cause expensive repairs due to "drive line bind".

I have a 200 Ford F250. I have had the hubs replaced and serviced often and I am now having problems getting the 4WD to engage, hubs locked manually or not. The light on the dash illuminates, but the ... read more

[Ford Ranger Locking Hub \(4 Wheel Drive\) - Best Locking Hub ...](#)

Even though manual locking hubs are inconvenient, they're the best. They hardly ever cause a problem and when they're locked, they stay locked. Today it's as much about ease of operation as it is about dependability. Automatic locking hubs and shift-on-the-fly make engaging 4WD as easy as turning on the radio. But you know how it is: More technology often equals more problems. In this ...

[Ford Transit Free Workshop and Repair Manuals](#)

The reason why the 'super duty' ford trucks have manually locking hubs is by design....for a vacuum actuated hub to work, the wheel needs to spin min 3/4 of a turn. SuperDuty trucks are 'work trucks' so they are often off road, plowing snow etc...if you were in 2WD and got stuck in a vacuum actuated system it would be near impossible to have those hubs lock in if they truck cant move. Ford ...
