Reliability issues require a higher shot doctrine, which directly reduces effective magazine capacity. From a budgetary standpoint, homeland missile defense has been subject to decline relative to regional defenses as well as to the downward budgetary pressures that exist throughout MDA and DoD more broadly. At its height in 2002, homeland-related spending approached \$4.5 billion, but was \$2 ...

However, reliability can be difficult to specify. It is easy to use "qualitative" language such as, "our product needs to exceed customer expectations" or "our product should be more reliable than its competition." Joseph Juran, a famous quality pioneer, said, "If you don't measure it, you don't manage it." If an organization does not specify ...
