An urgent message, beautifully delivered. A riveting portrait, both chilling and inspiring, of our largest and most crucial natural resource. A marine biologist and leading deep-sea explorer for 30 years, Earle has witnessed what she calls a "'sea change'" in the state of the ocean. Exploding human population and technological advances have combined to despoil in decades a natural asset that ...

The sea below us, as pioneering marine biologist Sylvia Earle and others have demonstrated, churns with far more life than Carson ever dreamed. Sea Change is an enthusiastic celebration of that diversity and abundance. It's also a profoundly sobering account of the shortsighted human assault on ocean life. The "silent tide," as one reviewer wrote, may lie just offshore. Only a sea change in human habits and economies will save the oceans.

Sylvia Earle's Sea Change: A Message of the Oceans serves as a clarion call to humans to take a closer look at the life blood of planet earth, the oceans. The thoughtful mixture of wonder and concern outlines Earle's years of study and thousands of hours working, playing and living beneath the ocean's surface. Tales of discovery and enlightenment are interspersed with easy to read discussions of geology, biology, engineering, law and policy, to weave a tale advocating better stewardship of ...

Ocean acidification is the result of carbon dioxide combining with water and making carbonic acid. Much of the carbon dioxide released by cars and trucks, and the burning of other fossil fuels dissolves in the sea, thereby fatally changing its chemistry by gradually increasing the water's acidity — making it a less livable environment for many sea creatures.
