Describing Motion Chapter 2: section 1 Tuesday 9/26/13 2. 2 Goals for this lesson 1. Describe motion 2. Perform calculations to determine speed 3. Motion and Position • A reference point is needed to determine the position of an object • Motion occurs when an object changes its position relative to a reference point – Ex: How do people in a car know they are moving? – Ex: Throw a ball ...

[1.1.1 Describing Motion Describing Motion Answers 2\)](#)

8.1 – An object's inertia causes it to continue moving the way it is moving unless it is acted upon by a force to change its motion. " A. The motion of an object can be described by its position, direction of motion and speed. " B. An unbalanced force acting on an object changes its speed and/or direction of motion.
