Systems Analysis and Design (SAND) is an evolving field that still represents the point where business and technology intersects. As discussed in (Bajaj, Batra, Hevner, Parsons, & Siau, 2005), SAND represents the core of Management Information Systems (MIS) curricula but is underrepresented in the area of MIS research. The chapters in this book represent the state of the art in several streams that are ongoing in SAND research is Europe and North America. The chapters in this book are ...

System Analysis and Design - SlideShare

System design is the phase that bridges the gap between problem domain and the existing system in a manageable way. This phase focuses on the solution domain, i.e. “how to implement?” It is the phase where the SRS document is converted into a format that can be implemented and decides how the system will operate.
