[Ten Billion Tomorrows Brian Clegg](#)

Mr. Clegg's "Ten Billion Tomorrows" is a fascinating miscellany of enlivening facts and observations by an author steeped in (modern) myths and modern science. He juxtaposes informed discussions of SF works (such as James Blish's clever meditation on instantaneous interstellar communication, "Beep") with recondite scientific theories (in this case, the ideas of physicist Paul Dirac and more recent experiments in quantum entanglement). And he illustrates how science and technology ...

C.W. Reynolds Books April 3, 2019 Brian Clegg 's book Ten Billion Tomorrows: How Science Fiction Technology Became Reality and Shapes the Future is a book I've referenced twice before in blog entries. Once it was referred to in a passing reference and once it was mentioned by name. I think it's long overdue a proper entry of its own.

Now for a "lighter" tale: Brian Clegg's wonderful Light Years. He covers not only the science but also the art of light, some of it surprisingly early. In 1734, Louis Bertrand Castel played what must have been the first light and music concert. Keys on his clavichord shifted coloured tapes in front of candles to produce light patterns. "An extraordinary book", said our reviewer.
