The Science of Meaning — Derek Ball, Brian Rabern | Humanitas By creating certain marks on paper, or by making certain sounds-breathing past a moving tongue-or by articulation of hands and bodies, language users can give expression to their mental lives. With language we command, assert, query, emote, insult, and inspire.

In Derek Ball & Brian Rabern (eds.), The Science of Meaning, Oxford University Press. pp. 361-380. 2018. This paper starts out from the idea that semantics is a "special science" whose aim, like that of chemistry or ecology, is to identify systematic, high-level patterns in a fundamentally physical world.
