Tile is usually installed atop backer board, a concrete-type underlayment product that is impervious to water. It is particularly appropriate for use on bathroom floors, where water spills are common. You cut the sheets to size with a carbide scoring tool or a circular saw with a masonry blade, and then glue the pieces in place with construction adhesive or thinset mortar. You can also use a ...

Tileboard is sheet-good material that looks like ceramic or porcelain tile from a distance, but it is nothing like real tile. Although similar to the cheap, grooved paneling that was commonly used in recreation rooms and basement remodels in the 1970s, tileboard is made primarily of compressed wood fibers, which are then embossed with grooves to simulate the appearance of tile grout lines.
